Daily reviews:

- Study begins on the first day of class. Successful students read and review notes before each class to recall information from the previous class and to warm up for learning. *Review your notes immediately after each class to reinforce learning or within a 24-hour period for best recall.* Repeated exposure to the material will store it in your long-term memory.
- Studies show that as much as 80 % of material learned in class is forgotten within 24 hours if there is no review.

Success Tips

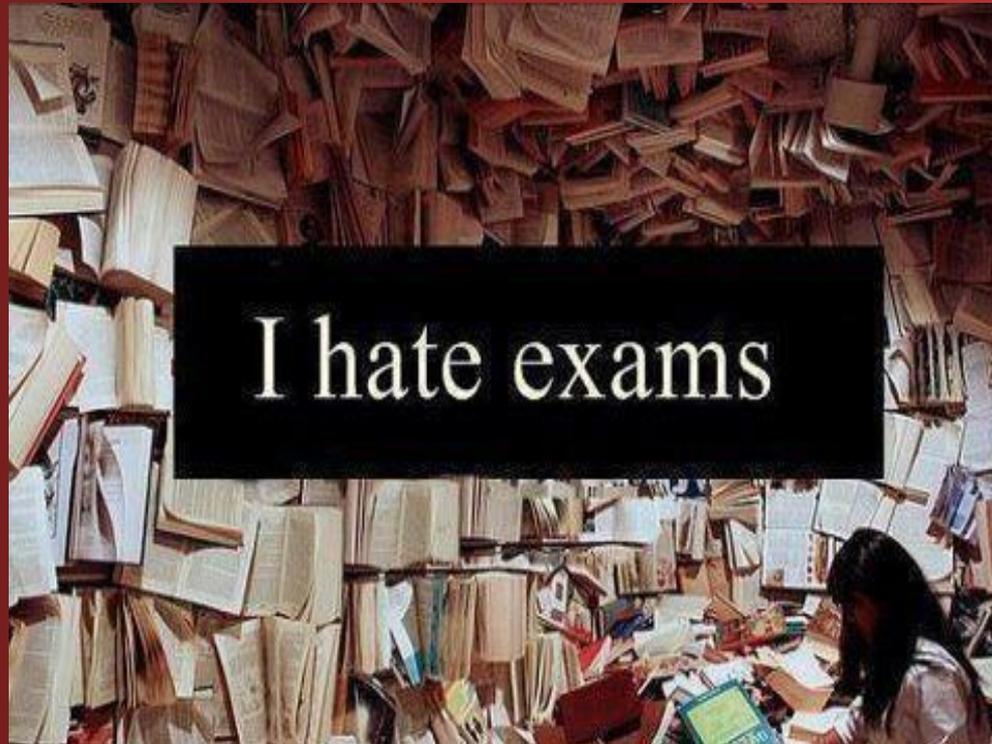

Weekly reviews:

- At the end of the week go over your notes for the week. This refreshes your memory and promotes better recall of the material. **Repetition is the key to remembering.** The more times you look at the material, the stronger you make the neural (brain) pathways that lead to the material. This makes recall much easier.
